 Others

Strip Category Base

Remove /category/ from category archive URLs. [Why do this?](#)
E.g. example.com/category/my-category/ becomes example.com/my-category

Redirect Attachments

Redirect all attachment page URLs to the post they appear in. For more advanced redirection control, use the built-in [Redirection Manager](#).

Redirect Orphan Attachments

https://www.zuofun.com

Redirect attachments without a parent post to this URL. Leave empty for no redirection.

Nofollow External Links

☒

Automatically add `rel="nofollow"` attribute for external links appearing in your posts, pages, and other post types. The attribute is dynamically applied when the content is displayed, and the stored content is not changed.

Nofollow Image File Links

☒

Automatically add `rel="nofollow"` attribute for links pointing to external image files. The attribute is dynamically applied when the content is displayed, and the stored content is not changed.

Open External Links in New Tab/Window

☐

Automatically add `target="_blank"` attribute for external links appearing in your posts, pages, and other post types to make them open in a new browser tab or window. The attribute is dynamically applied when the content is displayed, and the stored content is not changed.

-  Find and Replace
-  Accordion
-  Slider Revolution
-  AI Agent
- WP-Optimize
-  Collapse Menu

Affiliate Link Prefix

Example: /get/

Add the URI prefixes you use for affiliate (cloaked) links, which redirect to external sites. These will not count as internal links in the content analysis. Add one per line.
